

Chemical Application Schedule

Turf Pre-Emergent	February & September
Turf Post-Emergent	February, July & September
Bed Pre-Emergent	February, May & September
Turf Disease & Insect Control	January, March, May, July, September, November
Turf Fertilization	April & September
Bed Fertilization	April & September

Exact application timing will be dependent on weather and soil conditions and may vary slightly from the above schedule.

All pre-emergents will be applied with wetting agent & post-emergents will be applied with water conditioner to maximize effectiveness of applications.

All fertilizers will be minimum 80% slow-release Nutralene to ensure extended turf feeding times.
